I. HIGHLIGHTS

*During the first few months of 1985, the number of New Hampshire's unemployed ranged from the high 20,000's to the low 30,000's.

*Total population is expected to expand by 89,290 or 9.7 percent over the 1980 census, with a projection of 1,009,900 for FY 1986.

*The civilian labor force will continue to expand rapidly with the majority of the growth in the two southeastern counties.

*The civilian labor force is projected to reach 550,000 in FY 1986 which is a 21.0 percent increase over the 1980 census.

*Unemployment rates are expected to average around 4.9 percent for FY 1986. Coos and Strafford counties are expected to be the highest with 7.2 percent and 6.3 percent unemployment rates respectively.

*The total number of individuals who will actually incur a period of unemployment in FY 1986 is projected to reach 97,000. The average number of long-term unemployed (15 weeks or more) persons is expected to reach 6,060 for FY 1986.

*The number of economically disadvantaged is estimated at 97,810 which is a 29.8 percent increase over the 1980 census.

*Manpower services will be needed by persons lacking in employable skills, laid off due to industry wide closings who will require retraining in order to become employed, lack of work experience or educational requirements. These problems can be further hindered by geographic and transportation problems. In some areas employment is of a seasonal nature, as in the northern part of the state where some workers are required to have two skills in order to be gainfully employed throughout the year.

II. DESCRIPTION OF AREA

The State of New Hampshire is one of six New England States in the Northeastern part of the United States. Under CETA in FY 1983 there were two CETA Prime Sponsors in the State with Hillsborough County as one Prime Sponsor and the remaining nine counties comprising the Balance of State as the other Prime Sponsor and they were administered by the New Hampshire Office of Employment and Training. Beginning in FY 1984 there was only one service delivery area, the State of New Hampshire, as designated by the Governor. In Fiscal Year 1985 two service delivery areas existed similar to what was used in FY 1983. These same areas will exist for FY 1986.

New Hampshire shares its boundaries with the Province of Quebec to the north, the Connecticut River and the State of Vermont to the west, the State of Massachusetts to the south and the State of Maine and the Atlantic Ocean to the east. The State has seventeen miles of coastline along the Atlantic Ocean.

The average elevation in New Hampshire is 2,000 feet and approximately 84 percent of its 9,241 square miles is covered by forests. The southern section of the State consisting of Hillsborough, Merrimack, Rockingham and Strafford counties contains over seventy percent of the State's population.

The mountains in the north, the seacoast in the east and the many lakes and ponds throughout the state are all within easy reach from Concord, the State's capital. Concord is readily accessible from various Northeast major cities. Listed below are highway distances:

From:	To Concord:
Boston	70 miles
Montreal	240 miles
New Haven	174 miles
New York	250 miles
Portland	87 miles
Providence	110 miles

a) Economic Trends

The economic condition in New Hampshire is improving at a faster pace than in the past few years. Table 26 indicates that for per capita personal income growth between 1982 and 1983 New Hampshire is a little over three percentage points ahead of the national average. When compared to New England, the state is seven-tenths of a percentage point ahead and ranked first, along with Massachusetts, among the New England states.

Total personal income growth from 1982 to 1983 for New Hampshire was significantly higher than the national or New England averages. Table 27 illustrates this point, as well as the fact that New Hampshire is still ranked number one in percentage change from 1982 to 1983 with a 9.2 percent change for total personal income in New England.

The following tabulation of total wages serves to show the changing pattern in the share of industry between manufacturing and nonmanufacturing. Manufacturing continues to drop with only 39.3 percent of the total wages. Preliminary totals for the first three quarters of 1984 indicate manufacturing is increasing slightly.

Total Wages
New Hampshire
(Workers Covered by Unemployment
Compensation in Private Industry)

Year	Total	Manufacturing	Non-manufacturing	Percent of Total Mfg.	Non-mfg.
1973	$1,764,794,646	$ 764,904,559	$ 999.890,087	43.3	56.7
1974	1,912,311,974	815,835,934	1,096,476,040	42.7	57.3
1975	1,959,164,661	801,425,796	1,157,738,865	40.9	59.1
1976	2,260,558,803	950,208,803	1,310,350,000	42.0	58.0
1977	2,587,126,913	1,096,181,639	1,490,945,274	42.4	57.6
1978	3,041,007,264	1,281,209,453	1,759,797,804	42.1	57.9
1979	3,537,373,910	1,496,782,374	2,040,591,536	42.3	57.7
1980	3,957,283,436	1,684,829,094	2,272,454,342	42.6	57.4
1981	4,432,106,831	1,848,281,022	2,583,825,809	41.7	58.3
1982	4,846,866,740	1,941,164,597	2,905,702,143	40.0	60.0
1983	5,373,591,268	2,113,195,598	3,260,395,670	39.3	60.7

III. LABOR FORCE AND POPULATION DEMOGRAPHICS (TABLES 1 - 6)

Population in New Hampshire is expected to reach 1,009,900 during Fiscal Year 1986.

During the ten year period between the 1970 and 1980 census years, population increased an average of 2.5 percent annually. The annual gain from the 1980 census to FY 1986 is about 1.6 percent.

The males share of the population, as well as the females share, remained the same at 48.5 and 51.5 percent respectively, when compared to FY 1985.

Those individuals 65 years and older total 116,623 representing 11.6 percent of the population in 1986. The largest age group in the state is the 25-39 year olds with a total of 264,314. This represents 26.2 percent of the 1986 population.

The civilian labor force is expected to reach 550,000 in FY 1986, an increase of 21.0 percent over the 1980 census labor force. From 1980, the female civilian labor force increased by 31.3 percent while the male labor force increased by 13.2 percent.

The age group 25-34 year olds is expected to have the largest percentage of the labor force with 29.3 percent of the total. The labor force participation rate rose a little over two percentage points to 70.7 percent over 1985 estimates. The anticipated labor force participation rate is an increase of five percentage points from 1980 to 1986.

More job opportunities continue to become available for the female worker during this decade than they have in the past. Some factors for the increase in the female participation rate are more employer flexibility for hours and benefits, including a mother's shift, large shopping malls with the various shifts to cover the hours of operation and the increase in the level of educational attainment allowing women to be more qualified for a greater variety of work.

IV. INDUSTRIAL EMPLOYMENT (TABLES 8 - 13)

Annual average of nonagricultural employment reached 444,700 in 1984, an increase of 30,100 from 1983. The goods-producing industries fell 1.7 percentage points of the total nonagricultural wage and salary employment from 1980. Manufacturing lost 2.2 percentage points while construction and mining gained seven-tenths of a percentage point. The service - producing industries recorded employment gains in most industries from 1980. Services and other accounted for the greatest increase with 1.7 percentage points over 1980.

Changes in industry percentage followed a similar trend when comparing New Hampshire figures with those of the United States.

The following table shows the relationship of New Hampshire with the United States and the other New England states in March 1985:

Employees on Nonagricultural and Manufacturing Payrolls by Area (in thousands)

Area	Total Nonagricultural	Manufacturing	Percent of Total
Unites States	95,660.0	19,568.0	20.5
New England	5,987.8	1,509.7	25.2
Connecticut	1,543.2	425.2	27.6
Maine	437.5	106.0	24.2
Massachusetts	2,920.0	687.7	23.6
New Hampshire	456.2	123.9	27.2
Rhode Island	412.0	118.2	28.7
Vermont	218.9	48.7	22.2

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Boston, Massachusetts, May 1985.

New Hampshire's manufacturing percentage of the total nonagricultural employees as of March 1985 was above the United States and New England percentages, as it has been for the past few years. In the New England area, Rhode Island continues to lead with 28.7 percent. New Hampshire is ranked third at 27.2 percent. All of the New England states had a decrease in manufacturing employment, following the trend established in the United States. The time period of 1970 through to March 1985, shows the following trend:

Percent

Manufacturing to Nonagricultural Employment

Area	1970	1975	1980	March 1985
U.S.	27.3	23.7	22.1	20.5
N.E.	27.2	27.2	27.8	25.2
N.H.	35.4	28.3	29.8	27.2

New Hampshire still has a larger share of manufacturing employment than New England as a whole.

The following table shows the relationship of New Hampshire with the United States and the other New England states according to durable and nondurable goods in March 1985:

Employees on Durable and Nondurable Manufacturing Payrolls by Area (in thousands)

Area	Durable Goods	Nondurable Goods
United States	11,718.0	7,850.0
New England	1,028.8	480.9
Connecticut	319.3	105.9
Maine	44.4	61.6
Massachusetts	464.5	223.2
New Hampshire	85.1	38.8
Rhode Island	80.3	37.9
Vermont	35.2	13.5

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Boston, Massachusetts, May 1985.

The employment in the durable goods industries accounted for 68.2 percent of the employment in the manufacturing industries in New England, up 1.6 percent from the previous year. Maine, once again, was the only New England state where the employment in durable goods was less than sixty-five percent of the manufacturing employment. New Hampshire with 68.7 percent of the manufacturing employment in durable goods was third in New England.

Electrical products with 26,750 workers is the leading industry in manufacturing in New Hampshire followed by machinery with 24,050 workers. In 1984 durable goods with 82,450 workers had 66.9 percent whereas nondurable goods with 40,800 workers had 33.1 percent of all manufacturing (see Table 9).

Comparative growth of manufacturing employment in New Hampshire and the United States is shown in the following table:

Growth in Manufacturing Industries
New Hampshire and the United States
(in Thousands)

	New Hampshire		United States*	
Year	Average Employment	Percent Change	Average Employment	Percent Change
1973	96.0	5.7	20,154	5.2
1974	94.2	-1.9	20,077	-0.4
1975	85.1	-10.7	18,323	-9.6
1976	94.5	11.0	18,997	3.7
1977	101.5	7.4	19,682	3.6
1978	109.8	8.3	20,505	4.2
1979	116.5	6.1	21,040	2.6
1980	116.6	0.5	20,285	3.6
1981	116.6	0.0	20,170	-0.6
1982	111.7	-4.2	18,781	-6.9
1983	113.4	1.5	18,497	-1.5
1984	123.3	8.7	19,590	5.9

*SOURCE: Employment and Earnings, April 1985 Vol. 32, No. 4, Table B-1, pg. 79.

The employment increase in manufacturing of 8.7 percent is the largest increment to occur since 1976 for New Hampshire. The increase of 5.9 percent for the nation is the largest since at least 1970. New Hampshire is recovering from the recession of 1981-1982 much quicker and stronger than the nation. Where the United States had three consecutive years of decline from 1981-1983, New Hampshire had only one year of decline occurring in 1982.

Growth in trade and services, as shown in the following table, recorded the largest percent change since at least 1970. The overall growth in New Hampshire for the decade 1975 through 1984 was 62.0 percent compared with the nationwide rate of 37.1 percent. The growth of trade and services in New Hampshire for 1984 was almost double the growth for the United States.

Growth in Trade and Services
New Hampshire and the United States
(in Thousands)

	New Hampshire		United States*	
Year	Average Employment	Percent Change	Average Employment	Percent Change
1973	114.7	8.3	29,463	4.4
1974	117.8	2.8	30,428	3.2
1975	120.3	2.1	30,952	1.7
1976	127.2	5.7	32,306	4.4
1977	136.0	7.0	33,819	4.7
1978	145.5	7.0	35,794	5.8
1979	153.1	5.2	37,305	4.2
1980	157.9	3.1	38,200	2.4
1981	165.6	4.9	39,166	2.5
1982	168.0	1.4	39,493	0.8
1983	178.7	6.4	40,469	2.5
1984	194.9	9.1	42,449	4.9

*Source: Employment and Earnings, April 1985 Vol. 32, No. 4, Table B-1, pg. 79.

V. EMPLOYMENT INFORMATION BY OCCUPATION (TABLES 28 - 29)

Sales workers are projected to have the largest annual growth rate with 4.7 percent followed by Service workers with a rate of 4.3 over the period 1981-1991. The average rate of growth for all workers is 3.8 percent. The lowest growth rate is 3.0 percent which is found among the laborers and unskilled workers.

The following table shows the nineteen occupations that have a growth rate of 6.0 percent or better which is considerably higher than the average of 3.7 percent.

Occupations with Annual Growth Rates of
6.0 Percent or Better

Occupations	Annual Growth Rate
Peripheral Equipment EDP Operators	8.2
Coil Finishers	8.1
Electrical/Electronic Assemblers	7.3
Investigators, Insurance	7.2
Coil Winders	7.1
Child Care Attendants	7.1
Plater Helpers	7.0
Sales Agents, Insurance	7.0
Electrical/Electronic Assemblers	6.9
Electroplaters	6.7
Child Care Workers	6.7
Social Service Sides	6.5
Data Processing Machine Repairers	6.5
Worksheet Clerks	6.4
Testers	6.2
Mechanics, Aircraft	6.1
Dieticians/Nutritionists	6.0
Proof Machine Operators	6.0
Survey Workers	6.0

Note: Restricted to occupations with employment of 100 or more in 1981.

The fifteen specific occupations offering the greatest number of annual job openings by growth are listed below by order of rank:

Fifteen Occupations Projected to Have
the Greatest Numerical Growth

Occupations	Annual Growth
Sales Clerk	531
Sales Representative, Agents or Associates	485
Electrical/Electronic Assemblers	483
Waiters/Waitresses	474
Secretaries	382
Cashiers	372
General Clerks, Office	363
Nurses, Professional	293
Managers, Store	237
Nurses Aides/Orderlies	222
Food Preparation and Service Workers, Fast Food	215
Electrical/Electronic Technicians	210
Kitchen Helpers	193
Supervisors, Nonworking (ex. services)	188
Truck Drivers, Heavy	177

VI. UNEMPLOYMENT INFORMATION

a) Trends in Unemployment (Tables 6 - 7, 21 - 22)

Annual average unemployment for the state in 1984 was 22,000 with an unemployment rate of 4.2 percent. New Hampshire was tied with South Dakota for the lowest rate by state. Projected unemployment for FY 1986 is 27,174 with an unemployment rate of 4.9 percent. The economic stability that is anticipated should keep the unemployment levels between 4.5 and 5.5 percent.

Table 7 represents another view of the projected unemployment. An estimated 97,000 individuals will experience unemployment during some period in FY 1986.

Of the 97,000 unemployed workers, males will account for 53.6 percent. The number of long-term unemployed is expected to reach 6,060 with males accounting for 69.1 percent. Hillsborough and Rockingham counties are projected to account for 49.9 percent of the long-term unemployed.

New Hampshire exhaustees in the first quarter of 1985 (Table 22) totaled the lowest it has been in years at 419 with 263 or 62.8 percent male. Rockingham and Strafford counties accounted for 66.8 percent of the exhaustees in the first quarter of 1985.

Approximately forty percent of the exhaustees received weekly benefits of $126 or more. Table 21 shows the breakdown by state and counties.

b) Insured Unemployed (Tables 23 - 25)

The data on insured unemployment are based on information as of April 1985.

The total insured unemployed in the state dropped almost two thousand to 3,820 since April 1984 with 51.4 percent of the new total being female. The manufacturing industries accounted for 52.1 percent with the nonmanufacturing industries being assessed the remainder of 47.9 percent. Comparing the male - female percentage of unemployed in manufacturing reveals that there are twice as many females as males. The same comparison in nonmanufacturing shows that male unemployed is twice the female unemployed with most of that occurring in construction and mining. Some of this is due to the seasonal nature of this industry in New Hampshire.

Table 24 shows that by major occupational classification, benchwork at 28.1 percent and professionals at 15.8 percent made up almost half of all insured unemployed in April 1985. Almost forty percent of the total were unemployed for one to two weeks.

The age group of 25-34 year olds had 1,113 insured unemployed which is 29.1 percent of the total. The same age group for the women accounted for 26.8 percent of the total female unemployed.

c) Employment Service Job Openings

A total of 21,901 job openings were received by the New Hampshire Job Service during the first nine months of FY 1985. During this period the Employment Service Section of the Department of Employment Security successfully placed 10,864 applicants with a placement ratio of 49.6 percent. Approximately half of all job openings received were in clerical, services and structural occupations. Benchwork and processing placement ratios were the highest while fish, farm and forestry applicants were the most difficult to place with a ratio of 26.5 percent.

New Hampshire Job Openings
Received and Filled
July 1, 1984 - March 31, 1985

Occupational Category	Openings Received	Openings Filled	Percent Filled
Professional, Technical & Managerial	896	297	33.2
Clerical	3,927	1,858	47.3
Sales	1,810	832	46.0
Services (including domestics)	4,537	2,004	44.2
Fish, Farm, Forestry	746	198	26.5
Processing	411	260	63.3
Machine Trades	1,892	946	50.0
Benchwork	1,614	1,096	66.2
Structural	3,533	1,802	51.0
Miscellaneous	2,535	1,598	63.0
Total	21,901	10,864	49.6

The following table shows the relationship between Active Applicants and Openings Received for the quarter ending March 31, 1985 in New Hampshire. The professional, technical and managerial group had the highest applicant per opening ratio with 5.9 while the fish, farm and forestry group had the lowest ratio with 1.1. The state average was 2.4 applicants per opening.

Occupational Group	Active Applicants	Openings Received	Applicants Per Opening
Professional, Technical & Managerial	1,687	287	5.9
Clerical	2,160	1,104	2.0
Sales	635	461	1.4
Services (including domestics)	1,958	1,149	1.7
Fish, Farm, Forestry	178	169	1.1
Processing	272	118	2.3
Machine Trades	1,342	549	2.4
Benchwork	1,554	426	3.7
Structural	2,327	784	3.0
Miscellaneous	1,497	571	2.6
Total	13,610	5,618	2.4

SOURCE: ESARS Table 10, A96

VII. ESTIMATES OF NEEDS FOR MANPOWER SERVICES (TABLES 7, 14 - 18)

Manpower services will be of prime importance to unemployed workers, especially the long term or hard core unemployed individuals, those employed part-time for economic reasons, the youth group and the poor or economically disadvantaged.

It is estimated that 97,000 individuals will be unemployed at some time during Fiscal Year 1986 of which 6,060 will by unemployed for fifteen weeks or more. Many of these individuals will require help in securing employment and retraining in order to rejoin the labor market. Females make up 46.5 percent of the total unemployed but only 30.9 percent of the long-term unemployed. These figures are down when compared to last year.

Manpower services will be needed by the economically disadvantaged to help eliminate their depressed circumstances. There will be an estimated 97,810 poor persons during FY 1986. Individuals less than 18 years old account for approximately 28 percent of the total population of the state but 33 percent of the economically disadvantaged. The number of cases receiving welfare assistance averaged 18,674 for 1984.

Persons employed part-time for economic reasons are another group that needs special attention. Some of the cause for individuals working on a part-time basis are material shortages, slack work, the inability to find full time work and lack of transportation to be able to enlarge their job hunting geographical area. Females comprise 48.7 percent of the total employment while their share of the part-time employed rises to 59.4 percent due to the fact that there are more part-time jobs for females than males.

The youth group is usually considered to be the one most in need of manpower services. The following table shows the employment, unemployment and the unemployment rate of the 16-21 year olds that make up the youth group.

New Hampshire Employment and Unemployment
For Youth 16 - 21 Year Olds
April 1985

Area	Labor Force	Employment	Unemployment	Unemployment Rate
New Hampshire	56,080	49,760	6,320	11.3
Belknap	2,060	1,450	610	29.6
Carroll	1,060	840	220	20.8
Cheshire	3,330	2,950	380	11.4
Coos	1,480	930	550	37.2
Grafton	3,970	3,390	580	14.6
Hillsborough	19,350	18,110	1,240	6.4
Merrimack	5,080	4,610	470	9.3
Rockingham	11,680	10,310	1,370	11.7
Strafford	6,350	5,700	650	10.2
Sullivan	1,720	1,470	250	14.5
Balance of State	36,730	31,650	5,080	13.8

Some of the possible causes for the unemployment rates on the above chart are: the lack of educational levels required, lack of employable skills and experience and little know-how in the details of job search or preparation for job interviews. Assistance is also needed in determining the labor market situations by industry and area together with being furnished information concerning prevailing wage and rate and job requirements. There is a tendency on the part of the youth group to leave and re-enter the labor force more often than the older age groups.

New Hampshire having a greater percentage of rural environment than many other states, has transportation and geographic problems which are accentuated, especially in the northern counties.

GLOSSARY

Annual Average The aggregate of 12 months data divided by 12. Annual Average data are commonly used for projections and other long-term analysis.

Applicant A person who contacts a local office of the Department of Employment Security to seek employment or obtain employability development services.

Average Hourly Earnings Average weekly earnings divided by average weekly hours.

Average Weekly Earnings Average total money earnings of production or non-supervisory workers in the survey week, including overtime, paid vacation and sick leave.

Balance of State New Hampshire minus Hillsborough County.

Benchmark Most economic time series utilize a sample trend made of the best available data at the time. Periodically the series are adjusted due to more complete information being available. This periodic adjustment is a Benchmark Revision and the point-in-time for which the more complete data was available is the Benchmark Date. Data is commonly referenced by their benchmark date, e.g., "data based on a March 1984, benchmark."

Civilian Labor Force See Labor Force.

Consumer Price Index (CPI) This index is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by CPI-U. The CPI is based on prices of food, clothing, shelter and fuels, transportation fares, charges for doctors' and dentists' services, drugs and other goods and services that people buy for day to day living.

Covered Employment Employment in an industry that falls under the coverage of the respective state's unemployment insurance program. In most states presently only agriculture, the self-employed, some employed students, religious organizations, full commissioned salesmen and elected and appointed officials have significant numbers of noncovered workers.

Current Employment Statistics (CES) Estimates of nonagricultural wage and salary employment and production workers hours and earnings by industry. CES produces these estimates monthly for each state and MSA from a sample of employing establishments in cooperation with the Bureau of Labor Statistics.

Current Population Survey (CPS) A monthly household survey of the population of the United States. This survey of 60,000 households is the data source for the national estimates of labor force composition. Some CPS data is also incorporated into the state and area labor force estimating procedures to improve interstate comparability.

Definitions - (1) Manchester MSA: city of Manchester and the towns of Allenstown, Auburn, Bedford, Candia, Goffstown and Hooksett.

(2) Nashua PMSA: city of Nashua and the towns of Amherst, Brookline, Hollis, Hudson, Litchfield, Londonderry, Merrimack, Milford, Mont Vernon and Wilton.

(3) Portsmouth-Dover-Rochester MSA: cities of Dover, Portsmouth, Rochester and Somersworth and the towns of Barrington, Durham, Exeter, Farmington, Greenland, Hampton, Lee, Madbury, Milton, New Castle, Newfields, Newington, Newmarket, North Hampton, Rollingsford, Rye and Stratham.

(4) N.H. Portion of Lawrence-Haverhill PMSA: towns of Atkinson, Brentwood, Danville, Derry, East Kingston, Hampstead, Kingston, Newton, Plaistow, Salem, Sandown, Seabrook and Windham.

Note: MSA represents Metropolitan Statistical Area and PMSA represents Primary Metropolitan Statistical Area.

Discouraged Worker Persons who want to work but made no attempt to find work in the past four weeks because of a belief that they could not find employment. Discouraged workers are not counted among the unemployed.

DOT Codes An occupational coding structure based upon job traits and relationships. The codes are published in the Dictionary of Occupational Titles.

Economically Disadvantaged An individual whose immediate family either receives cash welfare payments or whose annual income falls below the current Poverty Income Guidelines.

Educational Attainment Highest grade of school completed.

Employment by Place of Residence An estimate of the number of persons employed who live within a given labor market or other geographic area. All persons who worked for pay and unpaid family workers who worked at least 15 hours or more in the survey week are included, as are workers who were temporarily absent from their job due to vacations, labor disputes, etc.

Employment by Place of Work An estimate of the number of jobs filled in the survey week within a given area. Multiple job holders are counted for each job. In most states only the nonagricultural wage and salary workers are tallied by place of work. Labor disputants are not included in the estimates of employment by place of work.

Employment Security Automated Reporting System (ESARS) A computerized tally of all Job Service activities, job applicant and job openings characteristics.

Entry Level Job A beginning job that requires little or no experience, but may require a minimum amount of training or education for a specific position.

Hard-to-Fill Job Openings Job openings which have gone unfilled for a month or more. Some of the openings may be difficult to fill because of the job environment, wage scales or lack of qualified workers.

Hard-to-Place Applicant An applicant who is unable to be placed in a job due to (1) a lack of demand or (2) a lack of qualifications for a particular job.

High Demand Occupation Occupations which have a substantial number of job openings both in absolute terms and relative to the number of job applicants for that occupation. High demand may be the result of either high growth, high turnover and sometimes by a combination of the two.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South America, or other Spanish culture or origin regardless of race.

Index or Index Number A measure of relative growth compared with a base figure of the same time series. In index form the base period is set equal to 100, and data for other periods are expressed as percentages of the base value. Plural is indices.

Insured Unemployment A count of persons who have filed claims for state unemployment insurance benefits.

Insured Unemployment Rate An administrative tool which is the ratio of insured unemployment to covered employment lagged about 6-9 months.

Job Bank A computerized system which provides rapid dissemination of job orders throughout a network of Employment Division local offices.

Job Corps A national system of 60 residential centers in 31 states and Puerto Rico providing basic education, vocational training, counseling, health care, and other services to help disadvantaged young men and women, age 16 through 21, prepare for jobs and responsible citizenship.

Job Training Partnership Act (JTPA) An act which replaced the Comprehensive Employment and Training Act on 10/1/83. This act provides a new program and delivery system to train economically disadvantaged persons and others for permanent private sector employment. The training programs are administered by the State and planned and carried out through a partnership between the private sector and government at the local level. Programs include adult and youth training, training and placement assistance for dislocated workers and federal administered activities including programs for Native Americans, migrant and seasonal farm workers, veterans, labor market information, Job Corps and other national activities.

Labor Force All persons 16 years and older who are either employed or unemployed. Normally published as a civilian labor force by place of residence (See Employment by Residence).

Labor Market Area An area with a central community and economic concentration in which workers can generally change jobs without changing their residence. In most states labor market areas are either counties or groups of counties.

Labor Market Information (LMI) Data on a broad range of topics such as labor force, employment by industry and occupation, unemployment, population, earnings, wages, hours worked, training programs and labor turnover.

Metropolitan Statistical Area: A grouping of cities and towns with a total population of at least 75,000 or a central city of at least 50,000 with an urbanized area of at least 50,000 inhabitants.

Minority Group All races other than white, and the Spanish-American ethnic group.

Multiple Job Holders Persons who simultaneously work more than one job.

Nonagricultural Wage and Salary Employment Place of work employment that does not include the self-employed, unpaid family workers, domestics or agricultural workers. Conceptually this is probably the most consistent economic time series available to compare different labor markets over an extended period of time.

Non White Group All persons who identified themselves as Negro, American Indian, Chinese, Japanese, Filipino, Korean, or other races in response to survey or census questions.

Occupational Employment Statistics (OES) A program which produces occupational data for major industries once every three years. Projections by occupation are made which aid educators and other occupational planners.

Part-time Work Work that is less than 35 hours per week.

Per Capita Income Total personal income divided by total population.

Personal Income, Total Private and government wage and salary payments in cash and in kind, other labor income, farm and nonfarm proprietors' income, interest, net rents, dividends and transfer payments, less personal contributions for social insurance. It is measured before the deduction of personal income and other personal taxes. Dollars are not adjusted for change in consumer price index.

Primary Metropolitan Statistical Area: A large urbanized county or group of counties with socio-economic ties and at least one of these counties has a population of more than 100,000.

Qualified Applicant An applicant who meets education, experience, and performance standards for a job opening. These standards are set by the employer.

Seasonal Adjustments Minimizes the changes in any time series from normal annual occurrences, such as Christmas, summer vacations and weather. After seasonal adjustment any month can be compared with the annual average, or any other month and differences should then be due to economic trends or unusual occurrences. Seasonally adjusted data more accurately portrays underlying economic trends, but should not be used where the current level is more important to the data user than the economic trend. No meaningful seasonal adjustment exists for annual or annual average data since the purpose is to make monthly or quarterly data comparable to the annual average data.

SIC Codes Standard Industrial Classification code structure in which all establishments are classified by a four-digit code according to their primary economic activity. Frequently references will be made to SIC codes at the 1, 2, or 3 digit levels when a less specific classification is useful.

Survey Week The week that includes the 12th of the month is used as a reference period for most labor force data.

Time Series A set of consistent economic quantitative data collected at periodic intervals (most labor market information is monthly, but weekly and annual data is published for some items).

Total Employment A count of person, residing in an area, who worked for pay or profit during the reference week including the 12th of the month or had a job from which they were temporarily absent because of illness, vacation, labor dispute, or other reasons not reflecting a shortage of work, or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family.

Total Unemployment A count of persons, residing in an area, who did no work at all during the reference week including the 12th of the month, but were seeking work or awaiting recall from layoffs or the beginning of a new job within the next 30 days. This count includes persons receiving unemployment insurance benefits, those who have delayed filing for benefits but were eligible to receive them, those unemployed who have applied for benefits but were not eligible to receive them, unemployed workers who exhausted benefits in the current benefit year, unemployed workers from industries not covered by unemployed insurance and unemployed persons newly entering or reentering the labor force.

Types of Unemployment

Frictional - Unemployment that is frictional in nature i.e., short-term unemployment encountered in searching for a job, or from a temporary layoff.

Structural - Unemployment that is structural in nature i.e., mismatch between the skill requirements or existing job openings and the skills possessed by the current unemployed.

Cyclical - Unemployment that is cyclical in nature i.e., deficiencies in aggregate demand exist resulting in a level of labor demand that falls short of the available supply of workers.

Underemployment A term that includes both persons who are working part-time who would prefer full-time work, and persons working full-time in an occupation which does not utilize their skills derived from prior training or experience.

Unemployment Persons who were not employed during the monthly survey week but were available for work and had either (1) overtly engaged in a job seeking activity within the four week period up to and including the survey week; (2) were waiting to be recalled from a layoff; or (3) were waiting to report to a new wage and salary job within 30 days.

Unemployment Rate The number of unemployed persons expressed as a percentage of the labor force. Commonly the seasonally adjusted unemployment rate is referred to as the unemployment rate and it is usually the only rate quoted in the monthly news release on the U.S. unemployment situation (see Seasonal Adjustment.

Urbanized Area A geographical area where the population density is at least 1,000 persons per square mile.

Vietnam Era Veteran (VEV) Any person who served on active duty for a period of more than 180 days, any part of which occurred between August 5, 1964, and May 7, 1975, and was discharged or released with other than a dishonorable discharge; or was discharged or released from activity duty for a service-connected disability if any part of such duty was performed between these dates.

Work Incentive Program (WIN) Counseling, training, job development and supportive services are provided to employable recipients of Aid-to-Families-with-Dependent-Children (AFDC). The object is to place AFDC recipients into suitable employment.
